STUDENT RESEARCH PROJECT BULLETIN

- Project code: THS2026-67
- Project title: Development of a Multi-Tenant Task Management Application
- Reference duration: 6 months, May–October 2026; official dates require confirmation.
- Budget estimate: VND 15,000,000
- Coordinator: Ngô Hưng Thịnh
- Team members: Nguyễn Thanh Trọng, Trang Minh Chánh, Huỳnh Hồng Ân, Cao Tường Hưng
- Supervisor: TS. Ngô Bá Hùng
- Objective: A multi-tenant Kanban architecture with tenant context, isolation, authorization, consistency and resource management.
- Method: Problem → alternatives → criteria → implementation → evidence → report section.
- Report output: Architecture analysis, alternative comparisons, traceability, explanatory diagrams and an evidence register for dated local checkpoints.
- Limitations: Formal benchmarks, user studies, an optimal-placement conclusion and public-Internet/provider acceptance remain pending. Local tests are not research measurements.
- Products: LaTeX/PDF report and supporting bulletins/summaries for review; formal delivery requires team confirmation.
